

know the symptoms + practice prevention

WHAT ARE SYMPTOMS OF COVID-19?

Most people will have mild effects from the virus, but it can cause severe illness and pneumonia in others. Symptoms *may* appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- ☛ **Fever or chills**
- ☛ **Cough**
- ☛ **Shortness of breath**
- ☛ **Difficulty breathing**
- ☛ **Fatigue**
- ☛ **Muscle or body aches**
- ☛ **Headache**
- ☛ **New loss of taste or smell**
- ☛ **Sore throat**
- ☛ **Congestion or runny nose**
- ☛ **Nausea or vomiting**
- ☛ **Diarrhea**

This list does not include all possible symptoms. For the most current list of symptoms, please visit the CDC's website and see **Symptoms of Coronavirus**.
