Finally, many schools like to advertise the percentage of faculty with advanced degrees. UWA Teacher Connect participation will help you boost that statistic and promote your school system.

In exchange for the partnership services and scholarship, the University of West Alabama asks that your school system promote UWA to your teachers, your students and your community. UWA's goal is to attract at least five new graduate education students from each partnership school system within two online terms.

The University of West Alabama offers 38 Master's and Education Specialist Degrees that range in requirements from 30 to 48 credit hours. In Alabama, UWA also offers a Reduced Hour Option IL certificate. Under the UWA Teacher Connect program, a teacher is allowed 24 months to complete the degree while receiving the scholarship. Our five eight-week accelerated online terms per year mean teachers can easily earn their degrees in two years. This must be done while maintaining good academic standing in the university's Graduate School. The scholarship also only applies to a class one time; it will not be re-applied to the same course if the student has to retake the course or withdraws from a class for any reason. Please note that the UWA Teacher Connect scholarship cannot be used in conjunction with certain Veterans Administration benefits.
